

# Coding Challenge - Week 32 Day 1

Mr. Safety loves numeric locks and his Nokia 3310. He locked almost everything in his house. He is so smart and he doesn't need to remember the combinations. He has an algorithm to generate new passcodes on his Nokia cell phone.

Can you crack his numeric locks? Mr. Safety's treasures await you. Write an algorithm to open his numeric locks. Can you do it without his Nokia 3310? Return a string that only consists of digits.

## Example

`unlock("Nokia") => 66542`

`unlock("Valut") => 82588`

`unlock("toilet") => 864538`
